Assessment-Compliance-Implementation-Monitoring Platform: the #1 and only AI software built to reduce the 75% AI transformation failure rate; seamlessly integrates with 50-50-50 Assessments

CIQ 100 Professional

Cyber insurance isn't just protection — it's validation. NGAITA's Cyber Insurance Readiness Program starts with the CIQ 25 Fre Assessment, revealing the exact gaps standing between you and full underwriting approval. In minutes, you'll know whether your company's cybersecurity posture meets insurer and compliance standards. The process converts risk into evidence, aligning your policies, people, and processes before an incident ever occurs.

Result: Faster approvals, lower premiums, and claims that get paid — because you can prove readiness. When "good enough" won't secure coverage, ClQ 100 Professional becomes your competitive advantage. This 100-question, Al-driven framework goes for beyond a traditional checklist — it aligns your organization's operational or governance maturity, and risk documentation directly with insurer underwriting models. It integrates live telemetr ACIM Software and readiness scoring from AIQ 50:50:50, producing an insurer-ready dossier that demonstrates continuous compliance and financial defensibility. Executives use ClQ 100 to negotiate better premiums, eliminate exclusions, and shorten claim resolution time from months to days.
